DETAILED ACTION

1. The amendments filed October 25, 2002 has been entered and carefully considered. Claims 26 and 32 have been amended. Claims 26-29 and 32 are pending in this application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 26-29 and 32 are rejected under 35 U.S.C. 102(e) as being anticipated by McCormack et al. (USPN 6075179) substantially as set forth in Paper No. 19, paragraphs 3 and 4.

Response to Arguments

4. Applicant's amendments to claims 26 and 32 deleting the new matter "at least 27.6%" are sufficient to overcome the 35 USC 112, first paragraph rejection set forth in Paper No. 19, paragraphs 1 and 2.

5. Applicant's arguments with regard to the 35 USC 102(e) rejection over McCormack et al. (USPN 6075179) have been fully considered but they are not persuasive.
6. Applicant contends that McCormack "does not, either expressly or inherently, describe the use of an adhesive layer." This argument is not found persuasive because although McCormack does not specifically label their core layer as an "adhesive", the core layer of McCormack is co-extruded with a first skin and a second skin so that the first skin is attached to a first exterior surface of the core layer and the second skin is attached to a second exterior surface of the core layer. Because the first and second skin layers are "attached" to the core layer, the core layer of McCormack expressly reads on Applicant's "adhesive core layer". Additionally, it has been sufficiently established that both the core layer of McCormack and Applicant's adhesive core layer are comprised of the same resin and particulate fillers with average particle sizes in the same range, both may be stretched to create voids around the filler particles, and both "attach" together two outer hydrophilic polymeric resin layers of the same composition. Therefore, because the core layer of McCormack and the adhesive core layer of Applicant are substantially identical, the core layer of McCormack must expressly read on Applicant's "adhesive" core layer.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1771

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
